

INVESTMENT OBJECTIVE

The Trading Strategy's investment objective is to achieve capital appreciation across shifting economic and market environments, through both long and short positions in equities which are mainly but not exclusively listed on North American Recognized Markets. The short exposures will be achieved only through the use of FDI.

MONTHLY COMMENTARY

During the month, long positions and short positions added. At the sector level, positions in Consumer Discretionary added most to performance during the month (59 bps gross), followed by positions in Materials (56 bps), Industrials (35 bps), Financials (33 bps), Communication Services (26 bps), Information Technology (7 bps), Healthcare (6 bps), Real Estate (5 bps), Consumer Staples (4 bps), and Tactical Market Indices (3 bps). Positions in Energy and Utilities had minimal impact on return for the month. Currency hedging had minimal impact on return for the month. The Fund's delta-adjusted exposure averaged approximately 10% net long and 94% gross during the month. On a beta-adjusted basis, the Fund's exposure averaged approximately 1% net long and 117% gross. The Fund ended the month with delta adjusted exposure of 1% net long and 117% gross.

The fund had a solid month and took gross exposure up significantly as market action reinforced our views. Gross exposure increased by 32 points during the month on a delta adjusted basis. However, we reduced net exposure by 10 points during the month, and by 19 points on a beta adjusted basis. This was driven by a few factors, including fears that the Coronavirus could serve as a catalyst for disappointing global growth as well as specifically disrupt certain supply chains and consumer businesses. In addition, the flattening yield curve amid declining long rates caused us to get more bearish on cyclicals. Lastly, stronger performance and idea generation on the short side caused us to take up the shorts on a stock specific basis by a bit more than longs. On a sector basis, we reduced net exposure to Consumer Discretionary by 4 points and to Industrials and Communication Services by about 3 points, while we increased net exposure to Information Technology and Consumer Staples by about a point each. While not participating materially in the equity rebound so far in February, the Fund continues to perform positively for the month.

FUND FACTS

MONTHLY STRATEGY EXPOSURE FOR LAST 12 MONTHS

GEOGRAPHICAL BREAKDOWN

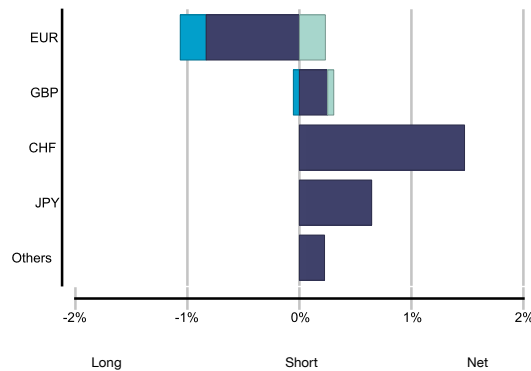

The geographic classification of a security depends on the location of the issuer's main business activity. Treasury securities are categorized according to the issuing country.

SECTOR ALLOCATION

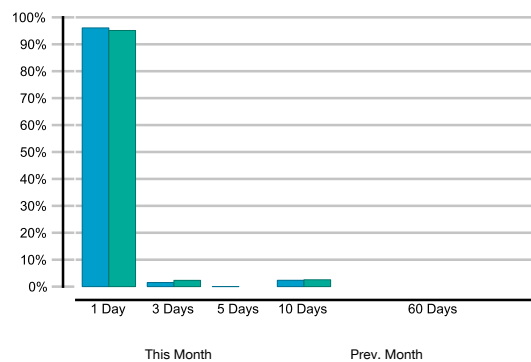

CURRENCY FX RISK

CAPITALISATION BREAKDOWN

EQUITY LIQUIDATION SCENARIO

The percentage of the equity asset that can be liquidated in the designated number of business days, assuming the sub investment manager is limited to selling no more than 25% of the average daily trading volume over last 60 business days. Average daily trading volume data is sourced from Bloomberg. For any security for which average trading volume was not available, it was assumed that the position could not be liquidated in one month.

MAIN RISKS

Risk of losses : The price of Shares can go up as well as down and investors may not realise their initial investment. The investments and the positions held by the Fund are subject to (i) fluctuations in the Strategy (ii) market fluctuations, (iii) reliability of counterparties and (iv) operational efficiency in the actual implementation of the investment policy adopted by the Fund in order to realise such investments or take such positions. Consequently, the investments of the Fund are subject to, inter alia, the risk of declines in the Strategy (which may be abrupt and severe), market risks, credit exposure risks and operational risks. At any time, the occurrence of any such risks is likely to generate a significant depreciation in the value of the Shares. Due to the risks embedded in the investment objective adopted by the Fund, the value of the Shares may decrease substantially and even fall to zero, at any time.

Counterparty risk: the Fund is exposed to the risk that any credit institution with which it has concluded an agreement or a transaction could become insolvent or otherwise default. If such an event occurs, you could lose a significant part of your investment.

Credit risk: the Fund is exposed to the risk that the credit quality of any direct or indirect debtor of the Fund (be it a state, a financial institution or a corporate) deteriorates or that any such entity defaults. This could cause the net asset value of the Fund to decline.

Operational risk and asset custody risk: in the event of an operational failure within the management company, or one of its representatives, investors could experience delays or other disruptions.

Liquidity risk: in certain circumstances, financial instruments held by the Fund or to which the value of the Fund is linked could suffer a temporary lack of liquidity. This could cause the Fund to lose value, and/or to temporarily suspend the publication of its net asset value and/or to refuse subscription and redemption requests.

Risk of using FDI: the Fund invests in financial derivative instruments in order to reach its investment objective. These instruments may include a range of risks which could lead to their adjustment or result in their early termination. This could lead to the loss of a part of your investment.

Capital at risk: the initial capital invested is not guaranteed. As a consequence, investor's capital is at risk and the amount originally invested may not be recovered.
